RECEIVED
MAY 17 2001
DIVISION OF
OIL, GAS AND MINING

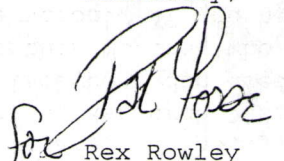

Dear Mr. Dunlop:

You are the designated operator for the 43 CFR 3809 surface management case file UTU-075857, the site of which is located in Section 6, T. 14 S., R. 19 W. Operations under this Notice took place on Resource Design Solutions mining claim RDS #61, UMC 367022, which has since been declared abandoned and void. There is a new claimant at the site of this Notice, who is willing to assume the reclamation liability for your operation. If you have any objections to having your notice transferred to a new operator, please inform us in writing within 10 days of receipt of this letter. You should inform us by amending your Notice, since a March 29, 2001 surface compliance inspection at the site of your operation revealed that operations actually took place in Lot 5, Section 5, T. 14 S., R. 19 W. We have also been informed that up to six core holes were drilled under your Notice. Please indicate in your amendment the location of these holes.

As we informed you in our letter of May 8, 2001, the 43 CFR 3809 Surface Management Regulations have changed. Please refer to the table page 70118 of the Federal Register that was sent to you with that letter. Amending your Notice will bring your operation under the provisions of the new regulations, therefore the minimal financial guarantee of \$1000 is required. Please submit this with your amendment. Pages 70126 and 70127 explain the types of financial guarantees acceptable to the BLM.

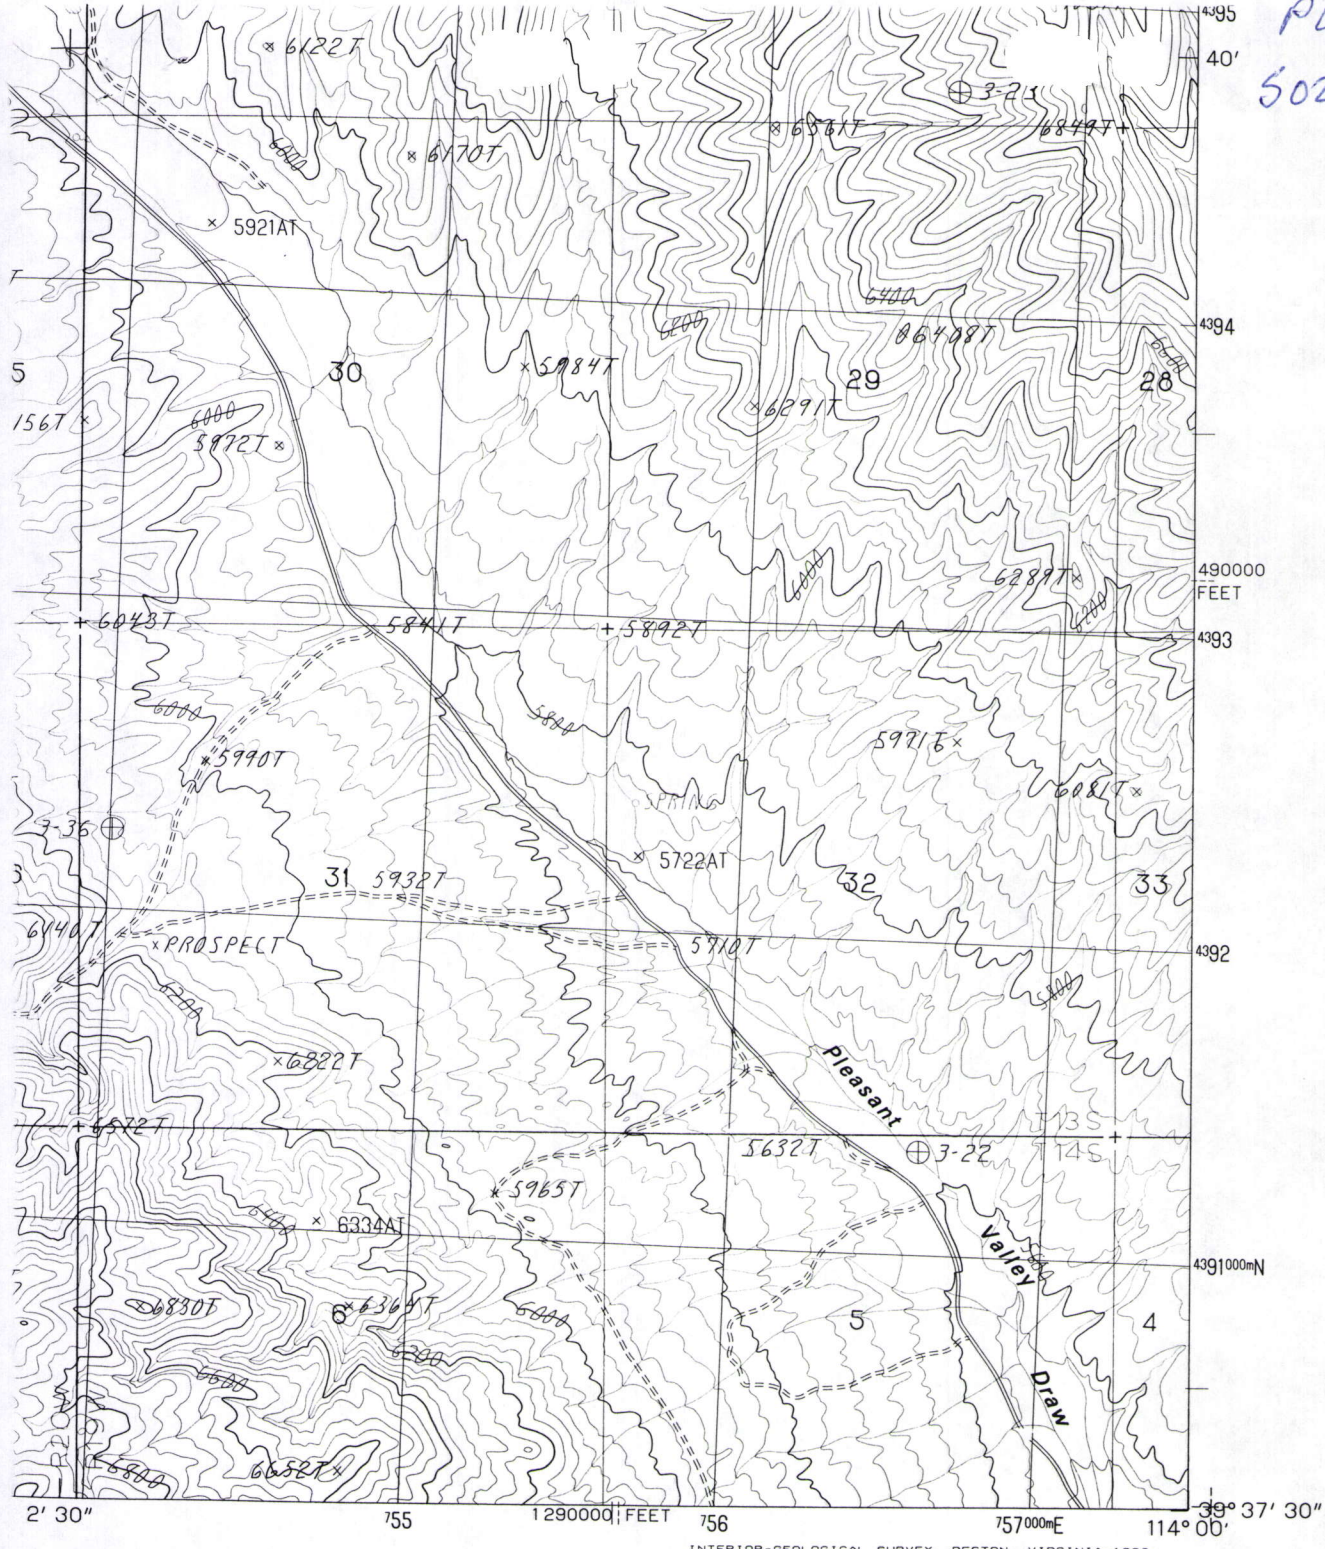

If you have any questions, please feel free to contact Larry Garahana, Sheri Wysong or Jerry Mansfield, at (435) 743-3126, (435) 743-3124 or (435) 743-3125 respectively, if you have any questions.

Sincerely,

Rex Rowley
Field Manager
